

1.
2.
3. First, let's add 7 hours to 11:30 am (count on your fingers if you have to).  $11 : 30 + 7 = 18 : 30$ , which is 6:30. Now we add the 25 minutes.  $30 + 25 = 55$ , so she works until
4. From 8 am to 12 pm is 4 hours. From 12 pm to 5 pm is 5 hours. So she is at work  $4 + 5 = 9$  hours. However, she gets one hour off for lunch, so she works  $9 - 1 = 8$  hours per day. If she works these hours Monday through Friday, she works 5 days a week, so in a week she works  $8 \times 5 = 40$  hours a week. If she makes \$11 an hour, she makes  $\$11 \times 40 =$   in a week. (note: people don't get paid for their lunch hours!)

7. Let's add up all the times.  $4 \text{ h } 15 \text{ min} + 20 \text{ min} + 3 \text{ h } 50 \text{ min} = 7 \text{ h } 85 \text{ min}$ . Now we need to turn 85 min into  $60 \text{ min} + 25 \text{ min} = 1 \text{ h } 25 \text{ min}$ , so the total time was  $7 \text{ h} + 1 \text{ h } 25 \text{ min} = 8 \text{ h } 25 \text{ min}$ .  
First let's find what time it is 8 hours from 12:45pm.  $12 : 45 + 8 = 8 : 45 \text{ pm}$ . Now we'll find out what time it is 25 min after 8:45 pm. Let's split 25 min into 15 min + 10 min. Now we find 15 min after 8:45pm is 9:00, and 10 min after 9:00 is
