F120 - Intermediate Problem Solving

Problem Set 1.1 - Place Values

Name:

Date:

1.
2.
3. $8750 - 507 =$
4. The prime one-digit numbers are 2, 3, 5, and 7. Note that 1 is not a prime number. So we find the largest and smallest 3 digit numbers are 753 and 235. So $753 + 235 =$
5.
6.
7.
8.
9.
