

1 cm

$1/2 \times 2 \times 4 = 4$        $1/2 \times 3 \times 2 = 3$        $12 - 4 - 1.5 - 1.5 = 5$

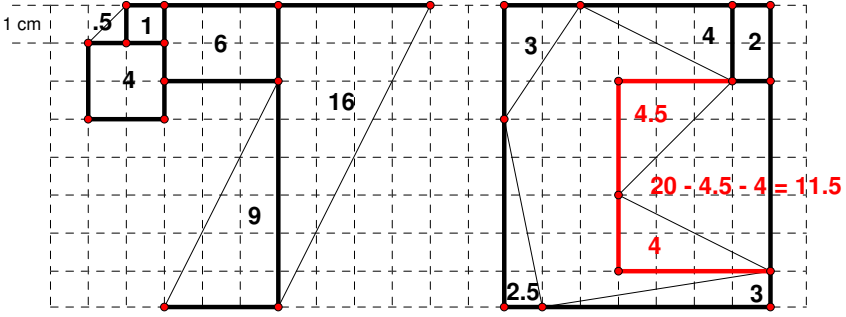

$1/2 \times 3 \times 3 = 4.5$        $1/2 \times 3 \times 3 = 4.5$        $1/2 \times 2 \times 4 = 4$

$1.5 + 6 + 3 = 10.5$        $15 - 3 - 3 - 2.5 = 6.5$        $3 + 3 + 1 + .5 = 7.5$

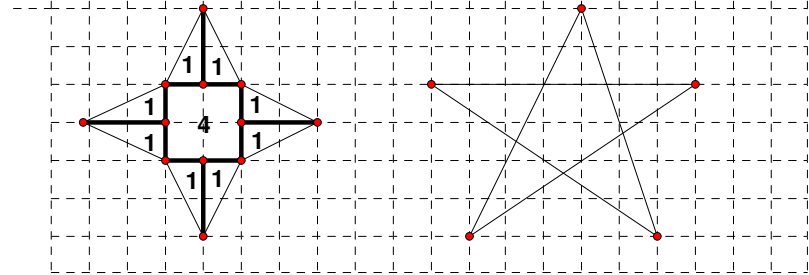

$15 - 3 - 4.5 - 1.5 - 1 = 5$        $15 - 1.5 - 1 - 3 - 1.5 - .5 = 7.5$        $12 - 1.5 - 1.5 - 1.5 - 2 = 5.5$

$.5 + 1 + 4 + 6 + 16 + 9 = 36.5$        $56 - 3 - 2.5 - 3 - 11.5 - 2 - 4 = 30$

1 cm

$4 + 8 \times 1 = 12$       problem too hard - omitted
