American Mathematics Contest 8 (AMC 8) is a national examination designed to promote the development and enhancement of problem solving skills in junior high schools (grades 6 – 8). The examination provides an opportunity to apply the concepts learned at the junior high level to problems which not only range from easy to difficult but also cover a wide range of applications. Many problems are designed to challenge students and offer problem solving experiences beyond those provided in most junior high school math classes. Calculators are NOT allowed. High scoring students are invited to participate in the AMC 10 which is the first step of a series of exams used by The Mathematical Association of America to select the United States of America Mathematics Olympiad (USAMO) team. To learn more or take training classes to prepare for the competition, please visit Avid Academy for Gifted Youth at [www.AvidAcademy.com](http://www.AvidAcademy.com).
